**Disk/Memory Support Contract (MNT-EHR-XX)**

The Disk/Memory Support Contract add-on allows customers with sensitive information to retain their Disk Drives and Memory Cards at the time of a service replacement activity. Under standard Riverbed contract offerings defective hardware becomes the property of Riverbed at the time of a service exchange and is required to be returned to Riverbed. The Disk/Memory Support Contract add-on allows the customer to retain the defective memory device(s) without incurring further charges. Silver contracted customers who purchase the Disk/Memory Support Contract add-on and experience a memory device failure will receive an advance replacement memory device.

NRD SKUs - For customers who do not have the EHR Support plan, can return systems without drives and will be charged back using the NRD- SKUs.

These SKUs are system specific and are charged 1/drive not returned.

**Enhanced Replacement System Support Contract - The Enhanced Replacement System Support Contract add-on allows customers with sensitive information to retain their whole System with Disk Drives and Memory Cards at the time of a service replacement activity. Under standard Riverbed contract offerings, defective hardware becomes the property of Riverbed at the time of a service exchange and is required to be returned to Riverbed. The Enhanced Replacement System Support Contract add-on allows the customer to retain the defective System without incurring further charges, however the customer has no rights to continue to use the defective System, as the license to the defective System will be transferred to the replacement System. Silver contracted customers who purchase the Enhanced Replacement System Support Contract add-on and experience a memory device failure will receive an advance replacement System.**
